Preface

Document describing the test suite definition for use with the Production Line Tool.

1. Test Suite Reference

1.1 Test Suites

Example: A minimal test suite, with a single test item, scanning a bar code.

```
title: "LY10-PLT demo: Scan"
suite:
  - ident: SCAN-T1
    title: Scan MAC address
    steps:
      - command: scan MAC_ADDRESS
```

1.1.1 Test Suite Structure

PLT test suites are encoded as YAML text files, starting with the test suite title.

```
title: "LY10-PLT demo: Scan"
```

The `title:` is followed by the `suite:` section, containing the test items in the test plan.

1.1.1.1 Test Items

Test items are identified with an `ident:` line, can contain a descriptive `title`, and should contain one or more test item steps.

During test execution, all test item steps need to complete successfully for the test item to succeed.

1.1.1.2 Test Item Steps

Test item steps consist of `command:` or `uartcmd:` blocks. A Test Item can contain multiple Test Item steps.

1.1.2 Basic Example

A basic In-Circuit Test suite for the PLT demo board.

```
title: "v0.1.8 (Green)"
suite:
  - ident: ICT-T1
    title: Identify DUT
    steps:
      - command: identify nRF52
  - ident: ICT-T2
    title: Erase nRF52 with FT2232H Mini Module
    steps:
      - command: erase nRF52
  - ident: ICT-T3
    title: Program LY10-DEMO-BOARD FW nRF52 with FT2232H Mini Module
    steps:
      - command: program nRF52 s132_nrf52_6.0.0_softdevice.hex, ly10-demo-fw-
0.1.8.hex, none
  - ident: ICT-T4
    title: BLE discovery
    steps:
      - command: bledis %BLEMAC% 30 # Wait up to 30 seconds for BLE discovery to
complete
```

1.2 Test Commands

1.2.1 bledis - Test BLE Discovery

Establishes a BLE connection to the DUT and discovers GATT services.

Usage:

```
bledis %BLEMAC% [<name>] [<timeout>] [<minRSSI>]
```

Argument	Description
<i>name</i>	GAP name advertised by DUT. %BLEMAC% to specify the DUT's BLE MAC address instead
<i>timeout</i>	Timeout, in seconds
<i>minRSSI</i>	RSSI treshold (optional)

Example: BLE discovery of identified BLE HW MAC address.

- **ident:** ICT-T1
 title: Identify DUT
 steps:
 - **command:** identify nRF52
- **ident:** ICT-T2
 title: BLE Discovery
 steps:
 - **command:** bledis %BLEMAC% 30 -60

1.2.2 erase - Erase DUT Flash

Erase DUT MCU on-board flash.

Usage:

```
erase <target> [UART0|UART1]
```

Argument	Description
<i>target</i>	Target to erase
UART0, UART1	Port for UART targets

Supported *target* values:

<i>target</i>	Description
DA14580	Dialog DA14580 RFSoc
ESP32	Espressif ESP32 RFSoc (JTAG)
ESP32_HomeKit	Espressif ESP32 RFSoc (JTAG; HomeKit)
ESP32_JTAG	Espressif ESP32 RFSoc (JTAG)
ESP32_UART	Espressif ESP32 RFSoc (esptool)
nRF52	Nordic nRF52 RFSoc (SWD)
nRF52_DevKit	Nordic nRF52 RFSoc (USB, JLink)
STM32F4	ST STM32F4xx MCU (SWD)
STM32F4_DevKit	ST STM32F4xx MCU (USB, JLink)
STM32L4	ST STM32L4xx MCU (SWD)
STM32L4_DevKit	ST STM32L4xx MCU (USB, JLink)

Example: Erase STM32L4 on-board flash.

- ident: ICT-T1
- title: Erase
- steps:
 - command: erase STM32L4

1.2.3 extflash_write - Write Peripheral Flash

Write DUT peripheral flash.

Usage:

```
extflash_write UART0|UART1 <filename>
```

Argument	Description
UART0, UART1	Port for UART targets
<i>filename</i>	Firmware Element Filename

1.2.4 freq - Frequency Monitor Control

Set the channel to use for frequency measurements.

Usage:

```
freq 0|1
```

Argument	Description
0	Use CLK0
1	Use CLK1

Example: Measure CLK1 frequency

```
suite:

- ident: ICT-T1
- title: Measure CLK1 frequency
- steps:
  - command: freq 1
  - command: sleepms 1000
  - command: measure frequency 7.90-8.10MHz

```

1.2.5 identify - Identify DUT

Identify DUT MCU and/or RF peripherals.

Usage:

```
identify <target> [UART0|UART1]
```

Argument	Description
<i>target</i>	Target to identify
UART0, UART1	Port for UART targets

Supported *target* values:

<i>target</i>	Description
DA14580	Dialog DA14580 RFSoc
ESP32	Espressif ESP32 RFSoc (JTAG)
ESP32_HomeKit	Espressif ESP32 RFSoc (JTAG; HomeKit)
ESP32_JTAG	Espressif ESP32 RFSoc (JTAG)
ESP32_UART	Espressif ESP32 RFSoc (esptool)

<i>target</i>	Description
nRF52	Nordic nRF52 RFSoc (SWD)
nRF52_DevKit	Nordic nRF52 RFSoc (USB, JLink)
STM32F4	ST STM32F4xx MCU (SWD)
STM32F4_DevKit	ST STM32F4xx MCU (USB, JLink)
STM32L4	ST STM32L4xx MCU (SWD)
STM32L4_DevKit	ST STM32L4xx MCU (USB, JLink)

1.2.6 measure - Probe Measurement

Usage:

```
measure <channel> [<signal>] <range>
```

Argument	Description
<i>channel</i>	Measurement channel
<i>signal</i>	DDTPxx or RDTPxx probe for pin measurement
<i>range</i>	Acceptable range

The `measure` command supports the following channels:

<i>channel</i>	Description
current3V3	3V3 current draw
current5V	5V current draw
currentVARV	VARV current draw
frequency	Frequency (CLK0 or CLK1)
impedance	Impedance measurement (RVREF/RA)
pin	Digital pin measurement (DDTPxx/RDTPxx)
voltageDATP07	DATP07 voltage
voltageDATP08	DATP08 voltage
voltageDATP09	DATP09 voltage
voltageDATP10	DATP10 voltage
voltageDATP11	DATP11 voltage
voltageDATP12	DATP12 voltage
voltageMUX0	MUX0 voltage
voltageMUX1	MUX1 voltage
voltageMUX2	MUX2 voltage
voltageMUX3	MUX3 voltage

Example: Electrical measurements

```
suite:
- ident: ICT-T1
  title: Measure CLK0 frequency
  steps:
    - command: freq 0
    - command: sleepms 1000
    - command: measure frequency 32.75-32.78kHz
- ident: ICT-T2
  title: Measure Impedance
  steps:
    - command: measure impedance 2-100hm
- ident: ICT-T3
  title: Measure Currents
  steps:
    - command: measure current3V3 <1A
    - command: measure current5V 0.1-0.5A
    - command: measure currentVARV >100mA
- ident: ICT-T4
  title: Measure Voltages
  steps:
    - command: measure voltageMUX0 >1V
    - command: measure voltageMUX1 <3300mV
    - command: measure voltageMUX2 >100mV
    - command: measure voltageMUX3 1500-1800mV
    - command: measure voltageDATP07 200-6000mV
    - command: measure voltageDATP08 -0.2-0.1V
    - command: measure voltageDATP09 0-4V
    - command: measure voltageDATP10 -0.1-3.3V
    - command: measure voltageDATP11 0-3.4V
    - command: measure voltageDATP12 -0.1-3.4V
```

Example: Digital pin measurement

```
suite:
- ident: ICT-T1
  title: Set Digital pins
  steps:
    - command: pin RDTP21 input pullup
    - command: pin DDTP04 input
- ident: ICT-T2
  title: Read Digital pins
  steps:
    - command: measure pin RDTP21 low
    - command: measure pin DDTP04 high
```

1.2.7 mux - Multiplex Control

Select a probe or signal for a multiplex channel.

Usage:

mux <channel> <signal>

Argument	Description
<i>channel</i>	Multiplex channel (0..3)
<i>signal</i>	Probe or signal

The following signals and probes can be assigned to a multiplex channel:

<i>signal</i>	MUX	Description
DATP00..DATP06	0, 1	Direct Analog Test Probes
RATP00..RATP31	0, 1	Routed Analog Test Probe
DDTP00..DDTP08	2, 3	Direct Analog Test Probes
RVREF	all	Impedance measurement, reference voltage

<i>signal</i>	MUX	Description
RA	all	Impedance measurement, test voltage
GND	all	Ground
3V3OUT	all	3.3V power rail
5VOUT	all	5.0V power rail
VARVDIV	all	VARV power rail, after 1/3 voltage divider

Example: Multiplex control

```
suite:
- ident: ICT-T1
  title: Setup MUX
  steps:
    - command: mux 0 DATP02
    - command: mux 1 DATP03
    - command: mux 2 RA
    - command: mux 3 RVREF
    - command: short 0 2 set
    - command: short 1 3 set
- ident: ICT-T2
  title: Measure impedance DATP02..DATP03
  steps:
    - command: measure impedance 10-200k0hm
```

1.2.8 operator - Operator Test

Instruct operator to perform a manual test step.

Usage:

`operator <message>`

Example: Instruct operator inspect housing.

```
- ident: ICT-T1
  - ident: FAT-T1
    title: Visual Inspection (manual)
    steps:
      - command: operator "Inspect Housing"
```

1.2.9 pin - Digital pin control

Configure a Digital probe.

Usage:

```
pin <probe> input [pullup]
pin <probe> output [low|high]
```

Argument	Description
<i>probe</i>	Probe (DDTPxx or RDTPxx)
input	Configure as input
pullup	Enable pull-up (only for RDTPxx pins)
output	Configure as output
low	Set low
high	Set high

Example: Control digital pins

```
suite:
- ident: ICT-T1
  title: Configure digital inputs
  steps:
    - command: pin DDTP05 input
    - command: pin DDTP03 input
    - command: pin RDTP04 input pullup
- ident: ICT-T2
  title: Control digital outputs
  steps:
    - command: pin DDTP00 output
    - command: pin DDTP02 output low
    - command: pin RDTP01 output high
```

1.2.10 power - Power Control

Control power applied to the Device Under Test.

Usage:

```
power off
power <rail> [on|off|<level>]
```

Argument	Description
<i>rail</i>	Power rail: 3V3, 5V, VARV or 12V
<i>on</i>	Turn on the specified power rail
<i>off</i>	Turn off all or specified power rail
<i>level</i>	Voltage level for VARV: 2..12.0

Example: Apply power

```
suite:
- ident: ICT-T1
  title: Apply power
  steps:
    - command: power 3V3 on
    - command: power 5V on
    - command: power VARV 10.2
- ident: ICT-T2
  title: Wait
  steps:
    - command: sleepms 1000
- ident: ICT-T3
  title: Power off
  steps:
    - command: power off
```

1.2.11 program - Program DUT

Erase and Program DUT MCU on-board flash.

Usage:

```
program <target> [UART0|UART1] [offset1:]<img1>,[offset2:]<img2>,[offset3:]<img3>[, ...]
```

Argument	Description
<i>target</i>	Target to program
UART0, UART1	Port for UART targets
<i>offset1</i> Opti	onal: Offset for 1st image
<i>img1</i>	Firmware Element (Bootloader)
<i>offset2</i> Opti	onal: Offset for 2nd image
<i>img2</i>	Firmware Element (Application)

Argument	Description
<i>offset3</i> Opti	onal: Offset for 3rd image
<i>img3</i>	Firmware Element (Partitioning)
...	Optional: Additional offsets, images

Supported *target* values:

<i>target</i>	Description
DA14580	Dialog DA14580 RFSoc
ESP32	Espressif ESP32 RFSoc (JTAG)
ESP32_HomeKit	Espressif ESP32 RFSoc (JTAG; HomeKit)
ESP32_JTAG	Espressif ESP32 RFSoc (JTAG)
ESP32_UART	Espressif ESP32 RFSoc (esptool)
nRF52	Nordic nRF52 RFSoc (SWD)
nRF52_DevKit	Nordic nRF52 RFSoc (USB, JLink)
STM32F4	ST STM32F4xx MCU (SWD)
STM32F4_DevKit	ST STM32F4xx MCU (USB, JLink)
STM32L4	ST STM32L4xx MCU (SWD)
STM32L4_DevKit	ST STM32L4xx MCU (USB, JLink)

1.2.12 scan - Scan Barcode

Scan a barcode using USB-attached barcode scanner.

Usage:

scan <format>

Argument	Description
<i>format</i>	Format of code to scan

Supported *format* values:

<i>format</i>	Description
%MAC_ADDRESS%	48-bit MAC address (XX:XX:XX:XX:XX:XX)

1.2.13 serial - Request serial number

Request a serial number through PLTcloud. Under Project Settings in PLTcloud, serial number allocation can be configured to use either monotonic counters, or through a WebHook.

Usage:

serial request

Argument	Description
request	Request serial number through PLTcloud backend

When a webhook is selected in PLTcloud, a JSON request will be sent containing:

```
{
  "dut_id": "<DUT IDENTIFIER>",
  "serial_number": "<SERIAL NUMBER>",
  "ble_mac": "<BLE MAC>",
  "mcu_id": "<MCU ID>",
  "MYCUSTOMKEY": "my custom value"
}
```

And PLTcloud should return something like:

```
{
  "serial_number": "<SERIAL NUMBER>"
}
```

1.2.14 short - Connect Multiplex channels

Usage:

```
short <muxA> <muxB> set|release
```

Argument	Description
<i>muxA</i>	Multiplex channel (0..3)
<i>muxB</i>	Multiplex channel (0..3)
set	Short specified multiplex channels
release	Release short between specified multiplex channels

Example: connect multiplex channels

```
suite:
- ident: ICT-T1
  title: Control shorts
  steps:
    - command: short 0 1 set
    - command: short 1 3 set
    - command: sleepms 1000
- ident: ICT-T1
  title: 0-2 instead of 0-1
    - command: short 0 1 release
    - command: short 0 2 set
```

1.2.15 sleepms - Delay

Temporarily suspend test suite execution.

Usage:

```
sleepms <duration>
```

Argument	Description
<i>duration</i>	Duration, in milliseconds

1.2.16 uart - Send and Extract UART response

Extract data from UART.

Usage:

```
uartcmd: uart UART0|UART1
  [[expect: <expectText>]
   [extract: <extractText>
    extractKey: <extractKey>]]
  [send: <sendText>]
```

Argument	Description
UART0, UART1	UART port
<i>expectText</i>	Text to expect, prior to extraction
<i>extractText</i>	Regular expression to extract
<i>extractKey</i>	Key in which to store extracted text
<i>sendText</i>	Text to send prior to extraction

Example: extract ICCID from cellular modem, storing in the **ICCID** key.

```
- uartcmd: uart UART0
  expect: "+CCID:"
  extract: "CCID: (\\d{20})\\r\\n"
  extractKey: ICCID
  send: "AT+ICCID\\r\\n"
```

1.2.17 uartAwait - Await UART response

Wait for a specific UART response.

Usage:

```
uartAwait UART0|UART1 <seconds>
```

Argument	Description
UART0, UART1	UART port
<i>seconds</i>	Time to await response, in seconds

Example:

```
- command: uartExpect UART0 Pressed
- command: operator "Press button"
- command: uartAwait UART0 1
```

1.2.18 uartCfg - Configure UART

Configure a UART port.

Usage:

```
uartCfg UART0|UART1 <speed> [<triplet>]
uartCfg UART0 tp
```

Argument	Description
UART0, UART1	UART port
<i>speed</i>	Baud rate
<i>triplet</i>	UART configuration triplet: 8N1 or 7E1
<i>tp</i>	Use alternate test points instead of UART. (Only for UART0)

Example:

```
- command: uartCfg UART1 9600 8N1
- command: uartCfg UART0 tp
```

1.2.19 uartExpect - Set expectation for uartAwait

Set a UART response to wait for with the `uartAwait` command.

Usage:

```
uartExpect UART0|UART1 <expect>
```

Argument	Description
UART0, UART1	UART port
<i>expect</i>	String to expect with subsequent <code>uartAwait</code> command

Example:

- command: `uartExpect UART0 Pressed`
- command: `operator "Press button"`
- command: `uartAwait UART0 1`

1.2.20 `uartReadTimeout` - Test if UART is not transmitting

Test if nothing is received from UART.

Usage:

`uartReadTimeout UART0|UART1 <seconds> [<sendText>]`

Argument	Description
UART0, UART1	UART port
<i>seconds</i>	Number of seconds to wait for incoming data
<i>sendText</i>	Text to send before waiting

Example: Test if modem is shut down.

- command: `uartReadTimeout UART0 1 "AT"`
